

'Meet the Scientist' Homework Project

In Science, we are exploring the Solar System. There are various scientists linked with this unit. The children need to research a scientist of their choice. Once they have found out the information, they need to bring their findings into school.

We will then 'hot seat' each scientist to find out information about them.

There are 'non-negotiable' information the children need to find and then a chance for the children to find out a little something extra if they wish.

- 🌀 Year/Date of birth
- 🌀 Where were they born? What nationality are they?
- 🌀 How do they link to our unit? What did they do?
 - 🌀 The children can find out as much information as they want
- 🌀 Year/Date of death
- 🌀 'Fun fact'
 - 🌀 This is the chance for the children to find out something that interests them about their chosen scientist

We will record evidence of the children sharing in our class **Deep and Wide book**.

Each interview is worth **25 team points**. Those that evidently go the **Extra Mile** with their research can earn **50 team points**.

The scientists to choose from are:

 Claudius Ptolemaeus (Ptolemy)	 Nicolaus Copernicus	 Galileo Galilei	 Neil Armstrong
 Margaret Hamilton	 Valentina Tereshkova	 Mae Jemison	 Helen Sharman
 Tim Peake	 Johannes Kepler	 Caroline Herschel	 Claudia Alexander
