Class News

With the SATs being just four school days away as I write this newsletter, you will not be surprised to hear that we have had a greater focus on the core subjects of Reading, Maths and Grammar since returning from the Easter break. There is SO much learning to revise and 're-remember' – it is akin to keeping all the plates spinning without any falling off! Of course, the children are working hard, embracing and learning from the small mistakes that they may make.

We are keeping up with the wider curriculum learning however, where we are excited to have begun designing ideas for a pasta salad and individual pizza in DT. Thank you to all those who have contributed £2 towards the cost of the ingredients (as far as I know, no-one has specified fillet steak!). In Science we are building our knowledge of the cardiovascular system and this will enable the children to plan investigations into lung capacity and the effect of exercise on heart rates. I am so pleased that we are giving time in History lessons to learn about the incredible civilisation of Benin in Africa. This will allow the children to learn a great deal from artefacts and also debate whether it is right that many of these items are held in museums all round the world.

Please see the notice above about Bikeability – **it is vital that you register your child for this training by May 5th**. Please do get in touch if you have any queries regarding this.
